REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of an optical coupling system comprising first and second positive lenses, wherein said first lens converts Gaussian beam like luminous flux into approximately parallel luminous flux and said second lens arranged to convert said parallel luminous into converged luminous flux as claimed, specifically wherein a distance $2L$ between the two lenses is selected to satisfy the claimed expression.

Specifically, with respect to independent claim 3, none of the prior art alone or in combination disclose or teach of an optical system comprising a reflective surface disposed at the rear of a positive refractive power lens, said lens converting Gaussian beam-like luminous flux emitted from a light source into approximately luminous flux as claimed, specifically wherein a distance between said lens and said reflection surface satisfies the claimed expression.
